

Lead with the package.

\$500/mo, 20 screens, ~30,000 plays. Let the client talk themselves into custom.

The price isn't made up.

One formula runs every venue. Same rate for everyone — that's your credibility.

Creative is free & silent.

We design the ad at no charge. On-screen text, no video, no voiceover to produce.

THE ELEVEN OBJECTIONS YOU'LL ACTUALLY HEAR

PRICE

"It's too expensive — I don't have that kind of budget."

Our entry package is **\$350/mo**; the popular one is **\$500/mo** — about **\$16 a day** for ~30,000 ad plays across the busiest venues in three markets. Prepay six months and the seventh is free, and your rate is locked for the life of the agreement.

GROUNDING: packages \$350 / \$500 · prepay 6→+1 free · rate locked for term

CUSTOM VS. PACKAGE

"Why does picking my own screens cost more than the package?"

Because they're two different plays. The **package is value** — we curate the venues, you get scale cheap (\$25/screen at 20). **Custom is premium** — you hand-pick OPC, the Airport, the marquee list, and hand-picked placement is worth more. A marquee build runs about **1.76×** the package for the same count. That's by design. *(If they've found a build that's **cheaper**, see the full-width card below.)*

GROUNDING: \$2.2 positioning · \$3d worked example (1.76×

CUSTOM VS. PACKAGE — THE CHEAPER BUILD

"I priced my own ten screens in your tool and it came out under your package. Why would I pay \$350?"

They're right about the number, and you don't argue with it — you show them what it buys. Ten of our lowest-attention screens does come out around **\$180/mo**, because à la carte prices every room by its own foot traffic and time in view, and those rooms floor out at **\$25**. That build is gas pumps, a liquor store, small retail, a dry cleaner — **every one of them at the floor precisely because the measured attention is low**. Same screen count, roughly **a third of the audience**:

THEIR CHEAPEST-FIRST 10 SCREENS — \$180/MO

9.9 min average time in view

≈30,900 impressions in four weeks

TEN SCREENS AT OUR NETWORK AVERAGE

47.5 min average time in view

≈96,250 impressions in four weeks

The close: don't tell them this — **show** them. Build both quotes in the tool side by side; it prints the impression count on each. *"Same ten screens either way. The package puts you in the rooms where people actually sit still."*

GROUNDING: \$7.3 dwell/impression comparison · \$25 floor · impressions shown on every quote · **NEVER SAY:** "that's a glitch" or "we'll fix that price" — the quote tool is authoritative and the build is a real, sellable product

PROOF

"How do I know anyone actually sees it?"

Every rate is built from **real venue foot traffic × time in view × how often the loop rotates**, credited at up to 6 views per visit — not a guess. It's priced at a **\$5 CPM**, the standard way outdoor and digital media is sold. The quote tool shows the impressions behind each venue.

GROUNDING: \$1 engine formula · \$5 CPM · 6-exposure cap

COMMITMENT

"Six months is a long commitment."

It is a six-month minimum — and here's the upside: your rate **locks for the life of the agreement**. As the network grows past 130 screens, early partners keep today's pricing. Prepay the six and you get a **seventh month free**.

GROUNDING: 6-month minimum term · rate lock · prepay 6→+1

SHORT TERM

“Can I just try one month?”

Standard placements run six months so the repetition actually builds recognition — that's what makes screen ads work. If you want a short burst, our **seasonal sponsorships are single-month takeovers**: Double Decker at \$1,500, Graduation at \$1,750.

GROUNDING: 6-month minimum · \$4 seasonal sponsorships (1-mo)

PRODUCTION

“Do I have to produce a video or make the ad?”

No — **we design your ad free of charge**. MCTV creative is clean on-screen text and graphics. There's nothing for you to film, no voiceover, no agency. Give us your logo and offer and you're live in days.

GROUNDING: creative included · silent on-screen-text network standard

NO AUDIO

“There's no sound — will people even notice it?”

Right — the network is **silent by design**; venues can't blast audio. That's exactly why every ad is built as bold on-screen text that reads in a two-second glance, and why we credit up to **6 exposures per visit**. The message lands visually, and we build it to do that.

GROUNDING: silent-network standard · 6-exposure cap

SKEPTICISM

“How'd you come up with my price? Is it negotiable?”

It's not made up, and it's the **same formula for everyone** — published in our rate spec. Traffic, dwell, loop length, a \$5 CPM, banded \$25–\$175 per venue. The public quote tool is the authoritative calculator: what it shows is the rate. No gut-feel pricing, no per-deal improvisation.

GROUNDING: \$1 “pricing down to a science” · quote tool authoritative

DISCOUNT PRESSURE

“Can you do better on the price?”

The list is formula-set, so there's no secret lower number — but there are two honest levers on the rate card: pick **10+ screens for 20% off** the custom total, or **prepay** (6→+1 free, 12→+2 free). Both are real, both are for everyone.

GROUNDING: 20% volume discount at 10+ · prepay bonuses

SEE IT FIRST

“I want to see everything before I sign.”

It's all on one page — mctvofms.com/rate-quote. You see the exact venues, the price, the impressions, and the plain-English terms, then e-sign right there. Nothing is binding until **MCTV countersigns**, so there's no risk in signing your side first.

GROUNDING: self-serve quote + e-sign · binding upon countersignature

The closer: don't describe the tool — open it.

Scan to pull up mctvofms.com/rate-quote mid-call: exact venues, live pricing, e-sign on the spot. Every number on this sheet comes from that page.
